

# PeopleAdmin Agnostic Framework PAAFx

PeopleAdmin, a PowerSchool Company, is a leader in HigherEd solutions. We clearly see the need for creating a connected environment of disparate applications amongst many institutions. Establishing uniform data structures, simplifying workflows and rules, and maintaining integrations across ecosystems can be complex and time-consuming.

## Why consider PAAFx?

The core problem institutions face is a lack of interoperability and data exchange between disparate higher education software solutions. This causes students, staff, administrators, and faculty to spend their valuable time trying to manually sync data between various applications. As of today, most institutions struggle with integrations that are:

- Tightly coupled and less resilient to change
- Expensive to maintain one-off fragile integrations
- Its own integration which creates hurdles for a single source of truth

## What is PAAFx?

PeopleAdmin created a state-of-the-art pure multi-tenant SaaS platform which solves the core problem of interoperability by creating connectors to any other SaaS or on-prem software application. These connectors are based on 20+ years of HigherEd experience and open-source technology framework expertise to offer subscription via PAAFx (PeopleAdmin Agnostic Framework). PAAFx is designed to meet the interoperable demands of higher education, resulting in:

- Reduced cost with managing data and interop across staff, administrators, and IT team of the intuitions
- Increased quality with loosely coupled interoperability
- Centralized data for a single source of truth
- Rich analytics to meet the increasing demand for cross-campus compliance needs

## Innovation in Interoperability

PeopleAdmin brings forth its innovation to meet the demands of interoperability. Using its pure SaaS Platform, PAAFx, Analytics, mobile capabilities, and compliance dashboards; institution leaders can easily use data and insights to drive data-based actionable results across and empower the higher education mission.

### Maximize Resources

Reduce costs associated with managing disparate applications across institutions

### Stability and Data

increased and centralized data quality with rich analytics

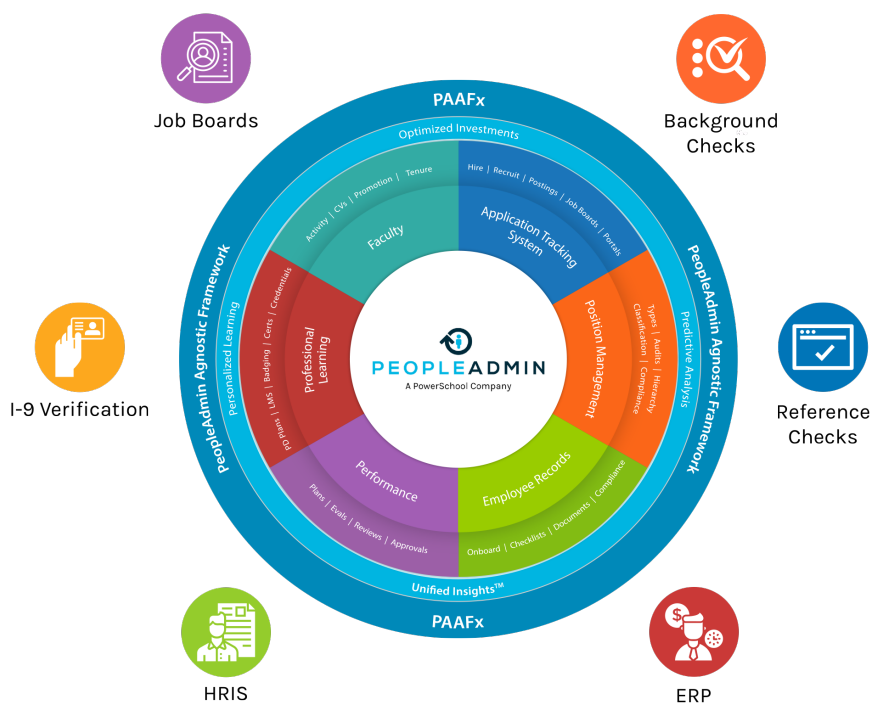

### Easy to Use

Gain technology buy-in with easier-to-use, integrated solutions

# Connecting Technology

Technology silos cause inefficiencies across all areas. 64% of administrators and staff agreed having data across systems more accessible make organizational change easier. \*

Our mission is to power the education ecosystem with unified technology that helps educators and students realize their potential.

## Key Features

- **OUT OF THE BOX CONNECTORS**  
between software systems, such as HRIS, ERP, background checks, job boards, reference checks, and I-9 verification services
- **EASY CONFIGURATION**  
and 100% ownership and maintenance by PeopleAdmin
- **NEGLIGIBLE IT MAINTENANCE**  
reduce the burden on institutions via subscription
- **UNIFIED DATA**  
across institutions and University System offices
- **RAPID DEPLOYMENT**  
with easily verifiable outcome
- **ROBUST AND REUSABLE**  
REST APIs built via open standards
