

PeopleAdmin Faculty Information System

Tell your institution's story one faculty member at a time.

Faculty achievements are pivotal to driving growth at institutions. Faculty Information System (FIS) provides a centralized hub for all data and activities.

We provide a platform for the full lifecycle of faculty from hiring and onboarding, to professional development, to achieving a promotion or tenure. We remove the time-consuming task of administrators, deans and leadership tracking, compiling and reporting on faculty activity. FIS executes these critical functions providing your faculty time to focus on research, teaching, and service.

Why consider FIS?

Data Management	Activity Management	Promotion & Tenure
. ORCID	. Dossier	. Committees
. Scopus	. Publication	. Approvals
. Crossref	. Bio/CV's	. Offers

Intuitive & Easy-to-Use

Modern interface for faculty and administration

FIS is easy to navigate from the moment you log in. Our streamlined, modern, and simple design allows faculty to focus on what matters - teaching, research, and service.

Simplified data-entry and workflows to sustain the inner-workings of how faculty function within your institution.

Personalized Approach

Faculty are the core of your institution

Faculty Members are essential to every institution as the heartbeat of supporting students, conducting research, publishing work, and serving on campus. Our platform caters to their needs in order to give them more time engaging with the work they are passionate about.

Analytics & Insights

Log in anywhere to record or gather data. Our top-down insights offer you a fresh perspective

Submit & Reuse

Submit your information one time and use it frequently

Security & Privacy

Security policies and processes in alignment with ISO 27001 and SOC2 controls.

Data Drives Decisions

Current and well-managed data are key to pushing your institution further in its mission of excellence. With engaged faculty, information and insights are available on demand in real-time.

Faculty members tell your institution's story daily, so the centralized FIS ecosystem tracks and analyzes your faculty data giving you the tools to better tell that narrative.

PeopleAdmin's Faculty Information System allows for faculty to track and maintain their own professional story, while allowing institutions to use that data to connect work, committees and more to better align with fulfilling the institution's mission.

HigherEd SaaS Platform
Workflow | Rules | Security | Analytics
